

ENVIRONMENTAL POLICY

Vell Marí Hotel & Resort is actively involved in the environmentally-sustainable economic development of the hotel and society in general. Its main objectives are to minimize the impact caused by the hotel's activities and to be more environmentally friendly.

Vell Marí & Resort wishes to support the implementation of initiatives and the consolidation of environmental management systems in tandem with the demands of our guests and the kinds of activities carried out in the establishment.

It is for this reason that we have implemented a series of environmental improvements throughout our resort and its operations, especially those which impact on the local environment. The main concerns are the efficiency of resources, especially water and electricity, but also the reduction of waste. Finally, we are gradually disposing of those products and services which affect the wellbeing of our guests and local residents.

THE MANAGEMENT PLEDGES TO:

1. Implement environmental management schemes.
2. Guarantee compliance with both obligatory and voluntary environmental legal requisites.
3. Revise and update our Environmental Policy regularly.
4. Demand that our suppliers gradually introduce the use of eco-friendly products and materials.
5. Implement the measures necessary to prevent and/or reduce our carbon emissions and use of contaminants, as well as cutting down our water and electricity consumption and the lessening of waste, in an attempt to minimise further our environmental impact.
6. Prevent contamination and protect natural resources and the local landscape, and also raise awareness among our guests.
7. Foster our staff's awareness of their responsibility to the environment through any necessary training.
8. Explain the principles of environmental action and good hotel practices to guests so that they are involved in the sustainable running of the hotel.

Vell Marí Hotel & Resort will employ the staff and economically-viable materials needed to establish a system of environmental management and will regularly revise the ecological objectives in accordance with the pledge of continual improvement.

The Environmental Policy of Vell Marí Hotel & Resort is available to all personnel, guests and the general public.

In Can Picafort, 1 May 2014.
